A DEVASC DEVELOPING APPLICATIONS AND AUTOMATING WORKFLOWS USING CISCO CORE PLATFORMS

This authorized five-day course is designed to help you prepare for the Cisco DevNet Associate certification and for associate-level network automation engineer roles. The focus of this course is implementation of basic network applications using Cisco platforms as a base, as well as implementing automation workflows across network, security, collaboration and computing infrastructure. The course provides hands-on experience solving real world problems using Cisco Application Programming Interfaces (APIs) and modern development tools. This course is designed for anyone who performs or seeks to perform a developer role and has one or more years of hands-on experience developing and maintaining applications that are built on top of Cisco platforms.

Od	Do	Délka	Kód	Místo	Cena
17. 6.	19. 6.	3 dny	Python3	Praha	15 600 Kč

A DEVCOR **DEVELOPING APPLICATIONS USING CISCO CORE PLATFORMS AND APIS**

The Developing Applications using Cisco Core Platforms and APIs (DEVCOR) v1.0 course helps you prepare for Cisco DevNet Professional certification and for professional-level network automation engineer roles. You will learn how to implement network applications using Cisco® platforms as a base, from initial software design to diverse system integration, as well as testing and deployment automation. The course gives you hands-on experience solving real world problems using Cisco Application Programming Interfaces (APIs) and modern development tools.
